Art Unit: 3625

DETAILED ACTION

On 29 March 2004, applicant filed the instant application with claims 1-35.

On 5 January 2007, the Examiner issued an Election/Restriction requirement.

On 5 February 2007, applicant cancelled claims 1-35 and added claims 36-107.

Response to Amendment

The reply filed on 5 February 2007 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s):

The claims presented are directed to subject matter that is different from elected and now cancelled claim 12.

Response to Amendment

Applicant agues:

The above amendments to the claims have been made to put the application in better condition for examination. Claims 1- 35 have been cancelled. New claims 36 - 107 are drawn to the subject matter of Group IV and are fit for examination.

Claims 36-52, 104 and 70-86, 106 are method claims for the electronic distribution of advertisements as set forth in Group IV. Claims 53-69, 106 and 87-103, 107 are directed to a system for performing the method of electronic distribution of advertisements as set forth in Group IV. Thus, the new claims are drawn to the elected invention.

The Examiner respectfully notes that applicant appears to support his arguments by having copied the preamble of claim 12 into the preamble of the new claims. Merely copying the text of the preamble is insufficient to preclude the requirement. See, for example, the *identical preambles* of Invention I (claims 1-6) and Invention II (claims 7-10) in the original election/restriction requirement of 5 January 2007.

The preambles of claims 1 and 7 are copied here for applicant's convenience:

Art Unit: 3625

<u>Claim 1</u>

 A system for sending cards and/or gifts to one or more celebrated entity using a computer network, comprising:

Claim 7

7. A system for sending cards and/or gifts to one or more celebrated entity using a computer network, comprising:

The Examiner respectfully notes that the new claims are directed to subject matter that is different from now cancelled claims 12-25, Invention IV.

Claims 36-51 (Invention VII) have separate utility from invention IV, such as

- a. generating a shell electronic greeting card including a primary message which a user wishes to convey to at least one recipient;
- b. modifying said shell electronic greeting card to generate a modified electronic greeting card which includes an advertisement integrated into said shell electronic greeting card, said advertisement including information regarding at least one consumer product, said advertisement being integrated into the electronic greeting card such that when seen the advertisement may be perceived by said at least one recipient as part of said electronic greeting card without interfering with said primary message of said electronic greeting card; and
- c. electronically transmitting via the Internet the modified electronic greeting card to said at least one recipient.

Claims 52-69, (Invention VIII) drawn to a system, contains separate utility from cancelled claim 12, such as a communications element.

Claims 70-86 (Invention IX), drawn to a method, contains separate utility from cancelled claim 12, such as

- a. generating a shell electronic greeting card including a primary message which a ser wishes to convey to at least one recipient;
- b. modifying said shell electronic greeting card to generate a modified electronic greeting card which include an advertisement integrated into said shell electronic greeting card, said advertisement including information regarding at least one consumer product, said advertisement being integrated into the electronic greeting card such that when seen the advertisement may be perceived by said at least one recipient as part of said electronic greeting card without interfering with said primary message of said electronic greeting card; and

Art Unit: 3625

c. electronically transmitting an invitation, via the Internet, to view the modified electronic greeting card to said at least one recipient.

Claims 87-107 (Invention X), drawn to a system, contains separate utility from cancelled claim 12, such as a communications element.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search for one is not required for the other, restriction for examination purposes as indicated is proper.

Conclusion

See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James H. Zurita whose telephone number is 571-272-6766. The examiner can normally be reached on 8a-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey A. Smith can be reached on 571-272-6763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
